the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.5 billion, and the number of people aged 65 and over has increased from 0.2 billion to 0.4 billion (United Nations 1999).

There are a number of reasons why the world population is ageing. First, the number of people who survive to old age has increased. In 1950, the life expectancy at birth was 47 years for men and 51 years for women. By 1995, life expectancy at birth had increased to 71 years for men and 76 years for women (United Nations 1999). This increase in life expectancy is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Second, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Third, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Fourth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Fifth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Sixth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Seventh, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Eighth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Ninth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.

Tenth, the number of people who are aged 65 and over has increased. In 1950, there were 0.2 billion people aged 65 and over in the world. By 1995, there were 0.4 billion people aged 65 and over in the world (United Nations 1999). This increase in the number of people aged 65 and over is due to a number of factors, including improvements in medical care, better nutrition, and a decline in infant mortality.
